

Besyncly for Shopify is a fully cloud-based integration solution that will revolutionise data communication within your business.

The **Shopify Besyncly** connector allows you to connect and integrate Shopify with a variety of business applications such as ERP, Accounting and CRM systems. With the ability to transfer data in real-time, or at customisable intervals, you have full flexibility to control where and when data is transferred.

What can Besyncly allow your Shopify platform to do?

The Shopify Besyncly connector offers you a comprehensive, reliable and customisable solution to connect your ecommerce platform directly to your back-end systems such as Xero, QuickBooks, NetSuite, Sage and Freshdesk.

Benefit from time-saving hands-off operation, allowing you more time to focus on your business.

Import Shopify orders in real-time.

Synchronise your inventory from your back-end systems in real-time.

The following can be automated using Besyncly for Shopify

SHOPIFY
Import Customers
Import Orders

Export Customers
Export Products
Export Orders

Main Features and Benefits:

Save Time and Money

Remove the need for the time-consuming manual transfer of data.

Make Informed Decisions

Get real-time reports instantly whenever and wherever you are, helping you make fast-paced informed decisions.

Cloud-Based

Being on the Google Cloud Platform means no need for downloads or updates.

Integrate Multiple Systems

Connect Shopify to multiple business systems.

Configurable

Customise our off-the-shelf integrations to meet the needs of your business. If we don't already offer the connector you require, we can work with you to produce this.

Security

Based on the Google Cloud Platform means your data is secure.

Easy to Set-Up

No need to be an IT expert to get Besyncly up and running with our pre-configured mapping, eliminating costly development and implementation fees.
